PRODUCT UPDATE

MP18.1 and MP18.2 Cable Drag Chain Series

The Murrplastik MP18 Cable Drag Chain series (outside open) is now discontinued and replaced by the MP18.1 and MP18.2 series of cable drag chains. This new series offers application flexibility as the MP18.1 opens from the outside while the MP18.2 opens from the inside. This can be further viewed in the Murrplastik Cable Drag Chain Catalog.

MP18.1 (Outside Open)

MP18.2 (Inside Open)

The form, function, and fit of the MP18.1 and MP18.2 remains unchanged. The inside height, inside width, and bend radius dimensions remain consistent with the original MP18 series. The MP18.1 and MP18.2 series have some interchangeable components providing fewer parts to inventory. The MP18 components are not compatible with either the MP18.1 or the MP18.2 series of cable drag chains.

Please contact the Murrplastik Sales Office for additional information and technical support.

Thank you.
