NEW PRODUCT RELEASE

KDL/E Panel Entry System

Murrplastik Systems, Inc. is pleased to announce the release of the KDL/E Panel Entry System line of products with improved gasket technology. The KDL/E, while allowing for an enlarged panel knock-out / cut-out, provides three major advantages versus the KDL/N Panel Entry System line of products:

- Housing design eliminates loose hardware components.
- Up to 20 cables can be configured through one single knock-out.
- Unique latch system provides ease of assembly for varying panel thickness.

Please contact the Murrplastik Sales Office for additional information and technical support.

Thank you.
