

FHS-C support bracket

FHS-C on UR5

PRODUCT INFORMATION

The FHS-C has been designed for the direct insertion of lines or protective conduits. The hook and loop tape has a slip-resistant coating and wraps around the cable packet as well as the robot. The variable lengths of hook and loop tape and the special contour of the base element makes the system exceptionally well suited for assemblies on a variety of robot models and machine components.

Advantages:

- low interference contour
- saves space
- low weight
- secure hold, even on conical surfaces
- quick fit, without pre-drilling
- quick routing adjustment is possible during implementation
